MEET @ CAPZA

OCT' 2019

Paris · France

Sergio Ruiz
CEO of Ivnosys

At Ivnosys we believe in the safe use of the existing technological solutions. Making organizations aware of the related risks is crucial for us. This is why we provide our clients with the necessary digital tools to safeguard the digital identity of their companies, protecting all the information that circulates among the organisation or in the communications with other stakeholders.

We support the digital transformation of the organisations, our solutions accompanying the digitalisation processes of our clients. Our services have impact on the companies as a whole, supporting innovative culture by creating an organisational and working structure that is flexible and dynamic. Thanks to our products, our clients can e-communicate with the highest security standards with public authorities, businesses and individuals. A digital reality of which Ivnosys is part.

CONTENTS

IVNOSYS:
ABOUT US

At Ivnosys we develop solutions to improve **cybersecurity and entrance digitalisation processes**. We provide prevention, management, control, reaction and support mechanisms that help corporations to **comply with the legal demands** within a highly changing environment. Guaranteeing the utmost legal compliance of your solutions, we are a **Trust Service Provider that meets the highest standards set by the eIDAS 910/2014 regulation**.

OUR SOLUTIONS

IvSign

Certificate centralisation

Cloud-based issuance and centralisation of your digital certificates. Work whenever and wherever you want without sacrificing the security of your company.

IvCert

Client-adapted electronic signature

Launch the digital signing of your documents with the guarantees and trust you require, collecting electronic proof.

One of our more noteworthy milestones is **our alliance with CAPZA** in 2018. The partnership between CAPZA and Ivnosys is a giant strategic step, **strengthening our international business capacity and our commercial structure**.

Ivnosys, headquartered in Spain, is **present in Europe and LATAM**, pioneering the international markets in which we are present thanks to the collaboration with our **partners: Deloitte, Atos, Accenture, EY, PwC, KPMG and Wolters Kluwer**.

WE PROTECT THE DIGITAL IDENTITY OF YOUR COMPANY

Nowadays, companies need digital solutions to be competitive and handle information in a flexible way, without sacrificing their security. Many administrative tasks performed are relatively unproductive. This is why it is important to support companies through their digitalisation processes.

WHAT DO WE OFFER TO YOUR COMPANY?

DIGITAL IDENTITIES
Solutions that enable the organisation to operate on-line in a secure, controlled manner.

PRIVACY
Control in certificate's access and use, avoiding cyberattacks and information theft.

INNOVATION
Permanent updates to ensure the legal validity of our solutions.

CERTIFIED COMMUNICATIONS
Guaranteeing the maximum legal level of security in document signing, in compliance with the eIDAS regulation.

PAPERLESS
Reduction of paper in offices thanks to our cloud-based solutions.

EFFICIENCY
Time and resource optimisation.

SOLUTIONS
Support in *Compliance*.

MOBILITY
Sending and signing documents from any device, providing greater flexibility.

CERTIFICATE CENTRALISATION

IvSign

Ivnosys has developed **IvSign**, the platform for the issuance and centralisation of digital certificates.

ARE YOU PROTECTING THE DIGITAL IDENTITY OF YOUR COMPANY?

Nowadays in businesses...

- There is no control over the digital certificates used.
- Certificates circulate randomly around the organisation, installed on the systems of different users.
- The use of certificates is not registered nor audited.

WHAT RISK DOES THIS ENTAIL?

- Fraudulent use of certificates.
- Certificate's theft.
- Access to confidential information.

WE HELP YOU CONTROL YOUR CERTIFICATES WITH THE UTMOST SECURITY:

Cloud-based centralisation. Manage and control the use of certificates from one single point, whenever and wherever you want.

Maximum security. Guarantee the protection of your certificates and issue new certificates easily thanks to our integration with the Certification Authority.

Auditing and legal recognition. Obtain a record of all the operations performed by each user and certificate.

Delegate the use of certificates to other users in the organisation with full control and security.

FIGURES SUPPORTING US

+ 50.000 companies.

+ 570.000 certificates.

+ 90.000.000 audits.

ELECTRONIC SIGNATURE
WITH THE HIGHEST LEGAL VALIDITY

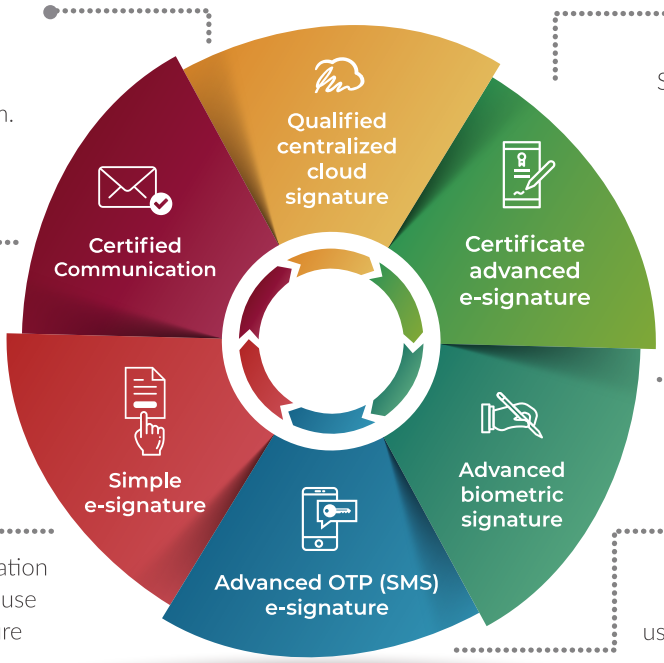
Ivnosys has developed **IvCert**, a certified communications platform.

IvCert

QUALIFIED CENTRALIZED CLOUD SIGNATURE
Qualified cloud-based digital certificate and signature system. It provides the highest level of signature security.

CERTIFIED COMMUNICATION
Secure transmission of documents, either by e-mail or by text message, with delivery and contents certification.

SIMPLE E-SIGNATURE
Express confirmation and validation of the terms and conditions of use and documents. Simple signature using accept/reject buttons.



CERTIFICATE ADVANCED E-SIGNATURE
Signature method at the highest legal level, ensuring the identity of the signatory and the integrity of the message.

ADVANCED BIOMETRIC SIGNATURE
This tool collects data such as contact position, pen speed or pressure, providing maximum security in the case of legal action.

ADVANCED OTP (SMS) E-SIGNATURE
Advanced electronic signature using a one-time PIN sent by text message to your mobile phone.

WORK IN THE SAFEST, MOST RELIABLE WAY:

Signature methods. Send documents for signing and select the type of signature required from the recipient.

Time stamping. Irrefutable proof providing information on when a document has been signed and the parties involved.

Proof collection. The process is filed and safeguarded so that it can be used in the event of legal action.

Integration with Outlook. Send documents from your e-mail platform.

FIGURES SUPPORTING US

+ **3.000.000** processes.
+ **100.000** operations per day.
+ **10.000** operations per minute.
+ **15** signatures per second.
